

Comments / Questions concerning the Collection Development Policy presented on 7/15/2026

The purpose makes reference to the mission statement. I am just wondering if this mission statement is easily found elsewhere or if it should be clearly stated within the policy.

In responsibility for selection is there a reason the statement concerning funds was removed?

In the definitions section the last line should be attached to the paragraph.

Section concerning display – what policies is this referring to that would directly impact this? This section needs more clarity.

Selection Criteria for minors, “Such materials undergo evaluation by the board...” I believe this would/should fall under the job of the director.

In gifts and donations is states “...collection may be disposed of our processed pursuant...” I believe our should be or.

Weeding once again refers to policies, what policies. Are these already in place or will they be created.

Physical Location and relocation policy, feels like a policy within a policy. This should be carefully reviewed and renamed or taken out altogether. It makes statements about weeding which does not line up with the title relocation and should be addressed in the weeding section.

I think if the board is creating the policy and the director is following the policy b and c will fall in line together and it only needs to be stated that “The director determines that such...” It almost seems that the whole location and relocation section is redundant and unnecessary.
